

TSAB Information Technology Services

Enterprise Resources Planning (ERP) Systems

(Executive Summary)

TSAB is a Saudi-based company offering services to the various industrial, commercial, and technical sectors in the field of information and industrial technologies. The company has provided excellent services in the past years to the satisfaction and admiration of important clients. In 2014, TSAB had the honor to be chosen out of 57 local IT companies by the Australian business consulting firm designated by Riyadh Schools/ Misk foundation for the implementation of their ERP system. Recently, TSAB has been short-listed among five companies by Saudi Aramco Corporate IT Department for the implementation of a major 5-year IT upgrade project.

TSAB has emerged as a prominent and reputable name in the field of data management and security and has especially excelled in ERP services. This was achieved through our select team of consultants and professionals that comprises the finest specialists in the field region-wide. Our team members have acquired vast expertise in their fields of specialty working for decades for major companies such as Saudi Aramco and SABIC. This qualifies them to master all the major systems from the best international vendors, develop in-house systems, and modify, secure, support, and improve the performance of all these systems.

TSAB stands out among competitors due the ability and concern of its team to thoroughly understand the various business processes and requirements of our customers in order implement and develop the most appropriate systems in a precise and effective manner. This ensures efficient, safe, intuitive, and easily customizable and upgradable systems, which guarantee that our clients will have better services, save wasted resources, avoid recurrent shutdowns, reduce the cost of maintenance and technical support, and protect data from cyber-attacks.

Since its inception TSAB put together exceptional resources and built unique expertise to achieve its vision of establishing itself as a digital transformation center of excellence that's distinguished from other traditional local ERP companies in its ability to revolutionize the implementations of ERP systems by closing the following service quality gaps in the regional market:

1. Proper mapping of business processes prior to ERP implementations
2. Agile and fitting advanced ERP system customizations
3. Inclusion of vital services typically declined by competitors such as data migration
4. Offering highly-demanded advanced ERP services such as system fine-tuning, data backup & recovery, and seamless system integration.

Based on all of the above, TSAB is proud to be in a position that is not contested by any of the smaller or larger local companies in this field.
